TO WHOM IT MAY CONCERN

Some ten or more years ago Te Wharekura o Rakaumanga purchased three custom designed framed shade structures from Shadepro, Tauranga.

After a site visit by Peter to confirm the appropriate design of the outdoor covers and suitability for our students and staff, they were custom built to suit.

The units have proved to be exactly what we needed. They have offered ample shade and protection proving to be most practical and durable over the years since being installed.

They have also been very cost effective and as Peter has pointed out, 'There is a price for quality'. We didn't want cheap units and have been very happy with the total package we have received.

The initial structures, designed and built to our requirements, (Shadepro have a full design service with CAD drawings, so you can see what you are getting, before you get it) have been excellent with fully certified, council approved engineering included.

Our installations, follow-up service and any maintenance requirements over the years have also been exemplary.

Some 5 years ago, we installed another set of 2 units over our junior adventure playground. These have also been built to the same high standards as previous, giving much needed UV cover over this area.

In 2011, Shadepro supplied and fully installed a further 6 units; 2 very large structures to cover our junior netball court, 2 over the intermediate school adventure playground area and a further 2 protecting swimmers and spectators alike using our pool area.

We have no hesitation in recommending Shadepro to any school thinking of protecting their tamariki and staff while outdoors.

The structures have proven to be tough & durable and well worth our initial investment.
