

HIP STRUCTURES

Why choose a Hip Structure:

- Cost effective
- Strong, stable design
- Practical solution
- Available in large spans
- Create height with maximum coverage
- Multiple units can be joined together

Shadepro have the solution!

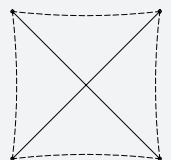

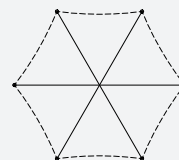

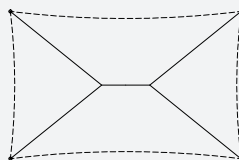

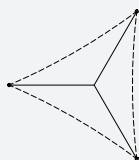

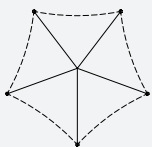

We Offer The Latest Shade Solutions

Hip structures are commonly used in schools, child care centers and council parks, but can be designed to suit most areas like, over a pool or as a carport cover.

Shadepro offer a large range of Hip Structures with various shapes and sizes in both shade and waterproof fabrics.

All items are made in-house with the best quality materials on the market and can be supplied as a complete package, fully installed or Kitset. Hip Structures are fully engineer certified and can be fabricated to suit all weather conditions.
